AVUS
the ring
traveller for
pole position

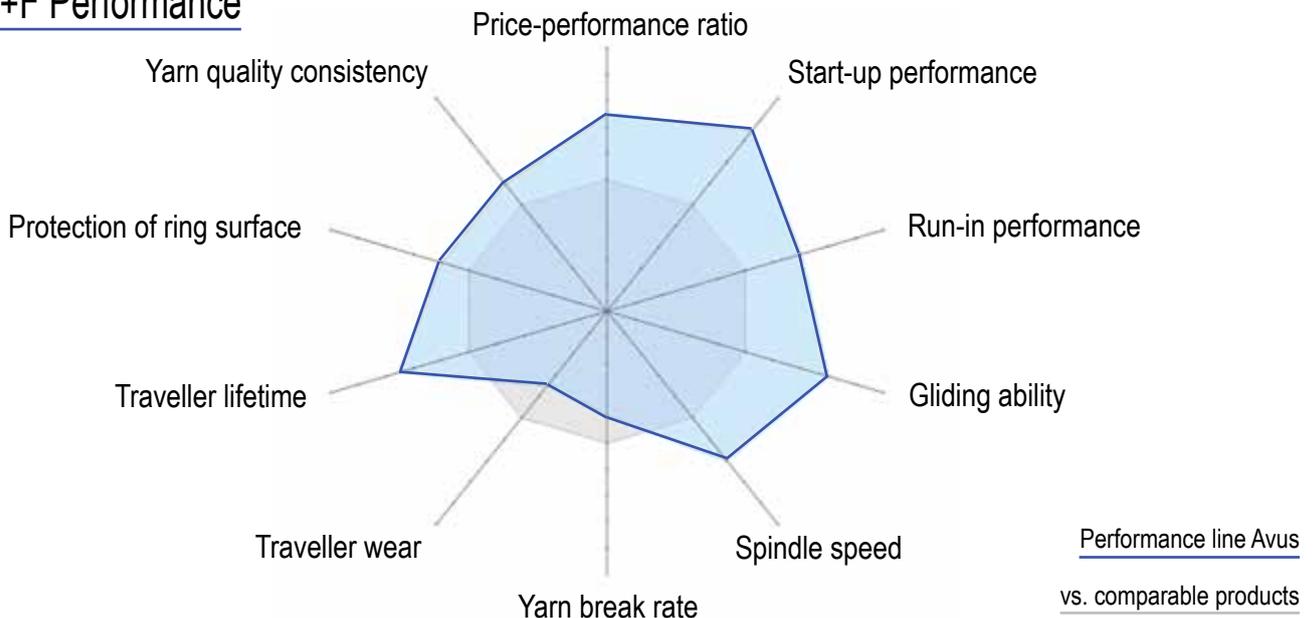

Avus: the ring traveller for pole position

The speedster in the R+F team:

Avus – named after the motor racing circuit that was once the fastest in Germany – offers the speed, lifetime and yarn quality to ensure success in your day-to-day business.

This speedster shows its strengths right from the start. Immediate optimal contact surface on the ring, and therefore an extremely protective lubrication film, create the optimal conditions for high-speed and compact spinning. This benefit is retained over the entire running time.

360° R+F Performance

Variants of travellers: Clip (magazined) or loose execution. Quantity depending on the ISO weight of the travellers.

Contact your R+F representative for further information and technical specifications or any R+F innovations.
